

*SPECIFICATION AMENDMENTS*

Replace title on page 6, line 21 with:

Description of the ~~to a~~ ~~the~~ Preferred Embodiments

Replace the paragraph beginning at page 7, line 8 with:

A worm gear 503 is secured to the output shaft of the electric motor 501. The frame 9 supports the worm gear 503 as well as an intermediate gear 502 with which the worm gear 503 meshes. The depending shaft from the intermediate gear 502 passes through the base 3. At the bottom side of the base, a pinion 504 is secured to the intermediate gear shaft so as to ~~rotating~~ rotate in unison with the intermediate gear 502 at all times that the motor 501 is activated.
